

## SUMMARY

QA Automation Engineer with a strong Full-Stack foundation. Specialized in designing and executing End-to-End (E2E) testing strategies using Cypress, Playwright and Selenium, as well as API test automation with Postman. Experienced in combining Shift-Left testing practices with the validation of critical business workflows to ensure the highest product quality.

## LANGUAGES

Spanish and Catalan (Native) | English (Profesional / C1)

## WORK EXPERIENCE

**Junior Analyst | Minsait**    *December 2024 - March 2025*

- Code quality assurance through unit testing with JUnit and Mockito, reducing the incidence of errors in production environments.
- Design and implementation of a comprehensive unit test suite using Jest, improving software reliability and maintainability.
- Development and evolutionary maintenance of scalable microservices using Java Spring Boot, ensuring efficient integration between modules.
- Implementation of dynamic user interfaces with React, optimizing the user experience in corporate web applications.

**Fullstack Developer (Internship) | AncoraDual**    *December 2023 - June 2024*

- Execution of full QA cycles and software validation, ensuring deliveries free of critical defects.
- Development of unit tests using Flutter Test and Mockito to ensure module reliability and correct functionality.
- Design and development of robust RESTful APIs with hexagonal architecture in the backend using Node.js, integrated with Angular/React frontends.
- End-to-end development of cross-platform mobile applications using Flutter, with a strong focus on usability and performance on iOS and Android.
- Requirements gathering and client needs analysis, translating business problems into effective technical solutions.

## CERTIFICATIONS

- Backend development with .NET [Microsoft]
- AWS Cloud Technical Essentials [AWS]
- Flutter Móvil De Cero a Experto [DevTalles]
- Node.js De Cero a Experto [DevTalles]

## SKILLS

- **QA:** Playwright, Cypress, Postman, Selenium
- **Cloud & Tools:** AWS, Docker, API RESTful, Git.
- **Backend:** Java, Spring Boot, Node.js, ASP.NET , C#, Python.
- **Frontend & Mobile:** React.js, Angular, Flutter, Dart, Vue.
